

RRC Neighbor Discovery & TDMA Coordination - All Capability Cases

OLSR Team RRC Neighbor Tracker RRC TDMA Controller TDMA Team API Application Layer

Real-World Scenario Examples:

1. Sensor Network: Most TX-only nodes (Node 6 type) sending data to RX-only displays (Node 7 type)

2. Voice Network: Full-duplex nodes (Node 5 type) for bidirectional voice communication

3. Surveillance: Observer nodes (Node 8 type) for topology maintenance without data transmission

4. Mobile Network: Dynamic joining/leaving with spatial reuse for capacity scaling

Emergency Response: F1 priority override for critical communications
